

Monoprice Cat6 Ethernet Patch Cable

Reliable Networking, Snagless Design

Product Overview

The Monoprice Cat6 Ethernet Patch Cable is a high-quality cable designed for reliable and fast network connections. Featuring a snagless RJ45 connector and pure bare copper conductors, it supports bandwidths up to 550MHz and data rates up to 1Gbps. The cable is ideal for both home and professional networking applications, offering enhanced durability and signal integrity.

Key Features

- Category 6 (Cat6) Unshielded Twisted Pair (UTP) cable
- Snagless RJ45 connectors for easy installation and protection of the retaining clip
- Pure bare copper, 24AWG stranded conductors
- Supports bandwidths up to 550MHz
- Data rates up to 1Gbps
- 50µm gold-plated contacts for corrosion resistance and superior conductivity
- Available in multiple lengths and colors
- UL® Code 444 and TIA-568-C.2 compliant

Technical Specifications

Product Number (P/N)	3435
Cable Type	Cat6 UTP
Conductor Material	Pure bare copper, 24AWG stranded
Connector Type	RJ45, Snagless, 50µm gold-plated contacts
Bandwidth	Up to 550MHz
Data Rate	Up to 1Gbps
Length	10ft
Color	Black
Certifications	UL® Code 444, TIA 568 C.2
Warranty	Lifetime warranty, 30-day money back guarantee
Environmental Warning	Contains chemicals including Lead. See https://www.P65Warnings.ca.gov

Applications

- Residential and commercial networking
- IT and data center environments
- Quick and reliable Ethernet installations

Package Contents

- Cat6 Ethernet Patch Cable (length and color as ordered)

Certifications

- UL® Code 444
- TIA-568-C.2
